"WEITRUCK": PC software for managing weigh bridges.

Software for a PC which allows to completely manage a weigh bridge system, combinable to the DFW and DGT series' weight indicators. Besides the complete management of the connected scale, the programme offers a simple and intuitive operator interface, wide range of supported functions, databases for the storage of the customer, material, and vehicle data, management of the totals and programmable printouts. Complete of alibi memory for approved systems.

MAIN FUNCTIONS

- Remote management of the weighing system, with display of all the scale status messages, selected storages, net, gross, and tare weights; execution of the ZERO, AUTOMATIC TARE, PRESET TARE, and PRINT functions.
- WEIGH MANAGED BY THE OPERATOR:
 - Single weigh, with entry of the vehicle tare weight.
 - INPUT/OUTPUT weigh, with recall of the input weigh through the vehicle plate or the weigh identifying code.
 - Customer, material and vehicle selectionable from database (over 5000 programmable storages) or with quick entry.
 - Completely programmable printouts, with graphic preview of the created format; the software allows also to create printouts with logos, barcodes, database date and all the weigh data under way.
 - Possibility of login with Smart Card, with management of various user groups (administrator, operator...).
- SELF SERVICE WEIGH:
 - This mode allows to use the weigh bridge without any operators, execution of the operations on PC, through the use of the BADGE or CHIP CARDS, directly programmable through the Weitruck, which contain the customer, material, and vehicle data.
- NOTE: along with the software also an alibi memory board will be supplied, to be installed on the weight indicator. This board also allows the functioning of the software and the approval of the system.

Wide range of connectable weight indicators.

SUPPORTED OPERATING SYSTEMS / MINIMUM SYSTEM REQUIREMENTS

- Windows XP professional SP2
- Pentium 3 1GHz or greater
- 256MB RAM
